

Whitepaper v1.0.4

PowerSOL is your lottery on Solana — decentralized, transparent, and secure. It's designed to reward the community, from cautious players to risk-takers. With VRF (Verifiable Random Function) draws, instant payouts, and seamless wallet integration, the protocol combines frequent rewards with life-changing jackpots for both players and affiliates. In the long run, the project aims to evolve into a DAO, achieving full decentralization with its own SPL voting token.

1. Lottery Models

Tri-Daily Lottery

The bigger the prize, the more winners we get.

Prize pools accumulate every 3 days, ensuring frequent winners and continuous engagement. Draw runs at 23:59:59 GMT, 0.1SOL per ticket. Odds 1:10

Tier	Winners (%)	Prize Share (%)
1	1%	20%
2	2%	10%
3	6%	12.5%
4	36%	27,5%
5	55%	30%

Seasonal Special Event

The bigger the prize, the more winners we get.

Accumulates over several months with distribution on the announced date; designed for larger rewards for patient players. Draw runs at 23:59:59 GMT, 0.2SOL per ticket. Odds 1:10

Tier	Winners (%)	Prize Share (%)
1	1%	20%
2	2%	10%
3	6%	12.5%
4	36%	27,5%
5	55%	30%

Monthly Jackpot

The more participants we get, the bigger the reward.

Distributed among 100 winners at the end of each month, following the same five-tier model. Bigger prizes. Draw runs at 23:59:59 GMT, 0.2SOL per ticket. Odds 100:Total Tickets

Tier	Number of Winners	Prize Share (%)
1	1 winner	20%
2	2 winners	10%
3	6 winners	12.5%
4	36 winners	27,5%
5	55 winners	30%

Annual Grand Prize

The more participants we get, the bigger the reward.

Prizes accumulate throughout the year and are awarded on Dec 31st to 3 winners — life-changing rewards to start the new year in wealth. Draw runs 23:59:59 GMT, 0.33SOL per ticket. Odds 3:Total Tickets

Rank	Prize Share (%)
1st Place	50%
2nd Place	30%
3rd Place	20%

2. Ticket System

Each PowerSOL ticket is registered as a unique transaction on the Solana blockchain, representing a verifiable and immutable entry into the decentralized lottery draws. Once created, the ticket automatically participates in the next eligible draw. All transactions are recorded on-chain, ensuring transparency and fairness through verifiable random selection (VRF). Winners receive automatic prize distributions directly to claim in their profile. No purchase limits.

3. Revenue Distribution

Each ticket purchased is allocated as follows: 40% to prizes, 30% to development, and up to 30% to affiliates — returning up to 70% directly to the community. Volume-based milestones further increase community rewards.

Stage	Development (%)	Affiliates (%)	Prizes (%)	Community (%)
Initial	30%	30%	40%	Up to 70%
Milestone 1	25%	25%	50%	Up to 75%
Milestone 2	20%	20%	60%	Up to 80%

Milestone 1 – 10M montly revenue.

Milestone 2 – 20M montly revenue.

4. Affiliate Program (weekly payouts)

Affiliates receive weekly rewards based on the number of validated referrals. The program offers up to 30% of total revenues across 4 tiers.

Tier	Referral Requirement	Revenue Share (%)
Tier 1	Up to 100 referrals with ticket purchase	5%
Tier 2	Up to 1,000 validated referrals	10%
Tier 3	Up to 5,000 validated referrals	20%
Tier 4	More than 5,000 validated referrals	30%

Payouts every wednesday 23:59:59 GMT

5. Missions System

The mission system encourages community engagement through gamified challenges such as connecting wallets, inviting new players, and consistent participation. Players earn power points for completing missions, which contribute to their eligibility and ranking in the upcoming PowerSOL token airdrop.

6. Airdrop System

Our airdrop system will take into account power points earned through missions, activities, and interactions with the project, including the affiliate base and content creation. We will allocate a portion of the total supply to early adopters, we will have a 3 tier NFT collection that will grant holders a special draw, voting power and airdrop bonus allocation. More details will be shared soon.

7. Voting System

SLP voting tokens will be created to decide the direction of the project and make it 100% decentralized. Each proposal submitted by users or by the DAO must go through two stages to be approved, with each stage involving token burning, making the project deflationary in the long term. More details coming soon.

8. Tokenomics

Under development.

9. Transparency & Technology

- **VRF:** All draws use a Verifiable Random Function, ensuring provably fair results.
- **On-chain monitoring:** Every ticket and payout is fully traceable on Solana.
- **Instant payouts:** Rewards are automatically distributed after each draw, directly to your profile to claim.
- **Wallet-only access:** No accounts, no emails — just your Solana wallet.

10. Governance and Roadmap

PowerSOL is evolving into a DAO. Below is the visual roadmap and detailed descriptions of each phase.

Phase 1 — Ecosystem Launch

Activation of lotteries (Tri-Daily, Seasonal, Monthly Jackpot, and Annual Grand Prize), affiliate program with weekly payouts, missions for engagement and airdrop calculation. VRF system live and public on-chain audit panel.

Phase 2 — Growth and Rewards

Launch of airdrop system and badges, UX/UI improvements, 2 traditional lottery models, community partnerships. NFT special pack. Independent security audit (e.g., Certik).

Phase 3 — Validation and Token

Token Generation Event (TGE), airdrop, holders exclusive lottery. NFT special draws.

Phase 4 — Full Decentralization (DAO)

DAO activation with on-chain voting system, transparent treasury management, community-driven prize parameters. Affiliates rewards evolving into Share Holders rewards.

Next Steps (Community Suggestions after DAO):

- Expand the range of games and explore new lottery formats.
- Launch a fundraising system for projects and charitable initiatives.
- Enable community-driven adjustments to prize and revenue distribution.
- Strategic marketing and partnerships voted.
- Encourage innovative proposals voted on by DAO members.

You own the Lottery. The future is yours. PowerSOL DAO
